

Problem

Visualizing ideas and thoughts in a way that the audience understands the message and stays attentive is challenging. Moreover, building presentations is **time-consuming** and **cost intensive**. Yet, they remain **monotonous, boring,** and **lack character**.

Digital Environment

Increasing number of online webinars and seminars worldwide

Academia

Over 6 million teachers use PowerPoint daily

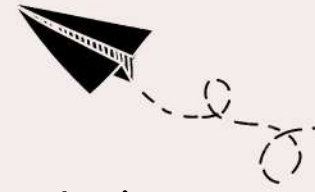

Corporations

PowerPoint is used by over 500 million people

300 million PowerPoint presentations made daily

Market Opportunity

Solution

We build an **intelligent software** for improving communication with **self-generating, engaging,** and **interactive presentations** based on **data science** and **academic involvement**.

Vision

Visualize the mind

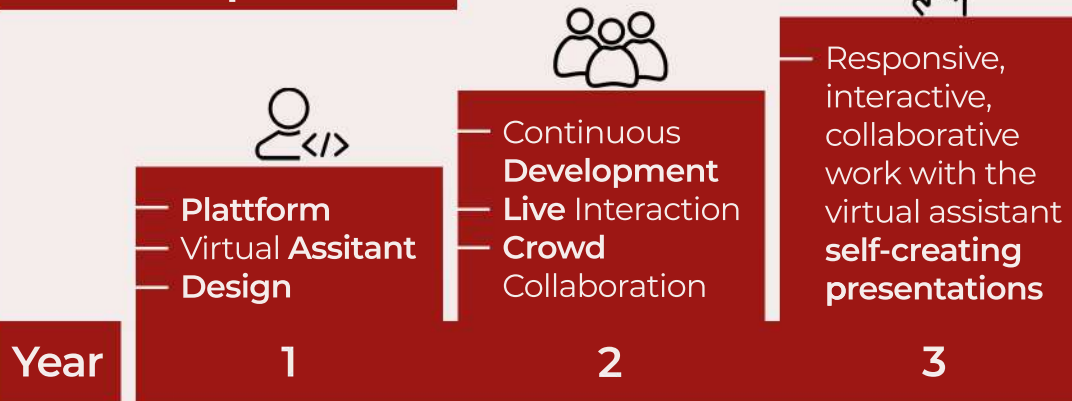

Mission

Be the solution for utilizing the **world's information,** promoting ideas across diversified **audiences,** and building connections that **enable ideas to grow.**
