

## Build Faster

- Compi is a mobile platform that gives full control of building processes to construction sites, while making sure the information created is accurate, comprehensive, updated and accessible.
- Compi is built to optimize cooperation between all construction teams.
- Compi accelerates construction projects, saves costs and allows for short and long term planning.

What we need **\$200K**

- Accelerate development
- Business development (reach more clients).

## Current status

Stable Beta with paying customers

## The Team

We have over **11** years of experience in GIS, infrastructure modelling, project management.

**Ran Loock** | Co-Founder & CEO

Experienced programmer for mobile and GIS.

**Dor Tzemach** | Co-Founder & CPO

UNIX expert, experienced GIS operator.

## Contact Us

054-5700544

Ran.Trisk@gmail.com

## The Opportunity

**11,900B\$** | World wide construction market

**2.71B\$** | World wide construction tech market size

**595B\$** | Rework of construction amounts to a waste of **5.3%** industry

Implementing technological solutions accelerate processes, reduce costs and prevents future damages.

## Business model

Fixed license cost based for each construction site

License per user

- Changes by the amount of users
- More users = less payment for each license

## Competitive advantage

- Compi allows fast field update
- Requires no additional hardware (aside a mobile phone)
- Creates the full picture for both above AND below the ground.

## Go-To-Market

Reaching contractors through tenders  
The tenders will make the contractors use Compi as one of the conditions

Creating a new and improved construction site control regulation (later on).
